# Table of Contents

<b>CHAPTER 1</b>	<b>INTRODUCTION TO VOLUME 2.....</b>	<b>1-1</b>
1.1	OVERVIEW OF VOLUMES 1 AND 2 .....	1-1
1.2	PURPOSE AND GOALS OF VOLUME 2.....	1-2
1.3	USING SCIENCE TO PROTECT AND MANAGE WETLANDS .....	1-5
1.3.1	<i>Ecological Principles to Consider.....</i>	1-5
1.3.2	<i>Challenges to Using the Science.....</i>	1-6
1.4	SCIENCE AND RISK MANAGEMENT .....	1-7
1.5	SCOPE OF VOLUME 2 .....	1-8
1.6	PROCESS OF DEVELOPING VOLUME 2 .....	1-10
1.7	HOW TO USE VOLUME 2 .....	1-11
1.8	HOW VOLUME 2 IS ORGANIZED.....	1-12
<b>CHAPTER 2</b>	<b>THE GROWTH MANAGEMENT ACT AND PROTECTION OF CRITICAL AREAS</b>	
2.1	INTRODUCTION .....	2-1
2.2	AN OVERVIEW OF THE GMA.....	2-1
2.3	A REVIEW OF HEARINGS BOARD CASES AND COURT CASES .....	2-2
2.3.1	<i>Designating Critical Areas and Adopting Regulations to Protect Them.....</i>	2-3
2.3.2	<i>Relationship of Critical Areas Regulations to Other Land Uses .....</i>	2-5
2.3.3	<i>Including Best Available Science in Critical Areas Regulations.....</i>	2-6
2.3.4	<i>Protecting the Functions and Values of Critical Areas .....</i>	2-8
<b>CHAPTER 3</b>	<b>KEY CONCLUSIONS FROM VOLUME 1</b>	
3.1	MAJOR CONCLUSIONS ABOUT OUR CURRENT EFFORTS TO PROTECT WETLANDS.....	3-1
3.2	WETLANDS IN WASHINGTON AND HOW THEY FUNCTION (CHAPTER 2 OF VOLUME 1).....	3-2
3.3	ENVIRONMENTAL DISTURBANCES CAUSED BY HUMAN ACTIVITIES AND USES OF THE LAND (CHAPTER 3 OF VOLUME 1) .....	3-4
3.4	IMPACTS OF HUMAN DISTURBANCES ON THE FUNCTIONS OF WETLANDS (CHAPTER 4 OF VOLUME 1) .....	3-7
3.5	THE SCIENCE AND EFFECTIVENESS OF WETLAND MANAGEMENT TOOLS (CHAPTER 5 OF VOLUME 1) .....	3-9
3.6	THE SCIENCE AND EFFECTIVENESS OF WETLAND MITIGATION (CHAPTER 6 OF VOLUME 1) ....	3-11
3.7	CUMULATIVE IMPACTS ON WETLANDS (CHAPTER 7 OF VOLUME 1) .....	3-14
<b>CHAPTER 4</b>	<b>FRAMEWORK FOR PROTECTING AND MANAGING WETLANDS USING BEST AVAILABLE SCIENCE</b>	
4.1	INTRODUCTION .....	4-1
4.2	FOUR-STEP FRAMEWORK FOR MANAGEMENT AND PROTECTION OF WETLANDS.....	4-2
4.2.1	<i>Incorporating Different Geographic Scales in the Four-Step Framework.....</i>	4-3
4.2.2	<i>Step 1: Analyzing the Landscape and Its Wetlands (Landscape Analysis).....</i>	4-7
Analysis of the Contributing Landscape and the Management Area .....	4-7	
Analyzing Wetlands at the Site Scale .....	4-8	
4.2.3	<i>Step 2: Prescribing Solutions .....</i>	4-8
Prescribing Solutions at the Scale of the Contributing Landscape.....	4-9	
Prescribing Solutions at the Scale of the Management Area .....	4-9	
Prescribing Solutions at the Site Scale.....	4-9	

Characterizing the Risk from Proposed Solutions .....	4-10
<b>4.2.4 Step 3: Taking Actions .....</b>	<b>4-10</b>
Taking Action at the Scale of the Contributing Landscape.....	4-10
Taking Action at the Scale of the Management Area .....	4-11
Taking Action at the Site Scale.....	4-11
<b>4.2.5 Step 4: Monitoring.....</b>	<b>4-11</b>
<b>4.2.6 Adaptive Management .....</b>	<b>4-12</b>

## **CHAPTER 5 ANALYZING THE LANDSCAPE AND ITS WETLANDS**

<b>5.1 INTRODUCTION .....</b>	<b>5-1</b>
Where to Find Supporting Information in Appendices.....	5-2
<b>5.2 LANDSCAPE PROCESSES AND THEIR INFLUENCE ON WETLANDS AND THEIR FUNCTIONS .....</b>	<b>5-3</b>
<b>5.3 GOALS AND OBJECTIVES OF ANALYZING THE LANDSCAPE (LANDSCAPE ANALYSIS) .....</b>	<b>5-4</b>
<b>5.4 QUESTIONS THAT CAN BE USED TO GUIDE AN ANALYSIS OF THE CONTRIBUTING LANDSCAPE AND THE MANAGEMENT AREA .....</b>	<b>5-5</b>
Question 1. What are the landscape processes in the contributing landscape and where were they located geographically before 1800 (pre-European colonization)? .....	5-6
Question 2. What are the relationships between these original landscape processes and wetlands and their functions in the management area? .....	5-7
Question 3. What alterations to landscape processes have occurred, and how have these changes affected wetlands and their functions? .....	5-8
Question 4. What geographic areas are currently important for maintaining landscape processes and can be impacted by future activities and growth? .....	5-9
Question 5. What potential measures are needed to protect and restore landscape processes in order to protect and restore wetlands and their functions? .....	5-9
<b>5.5 QUESTIONS THAT CAN BE USED TO GUIDE AN ANALYSIS OF INDIVIDUAL WETLANDS .....</b>	<b>5-10</b>
Question 6. What wetlands are currently performing functions that are associated with important processes identified in the landscape analysis?.....	5-10
Question 7. What degraded wetlands or former wetlands are suitable for restoring landscape processes identified in Question 3?.....	5-10
Question 8. What are the functions of individual wetlands that need to be protected, preserved, or managed?.....	5-11

## **CHAPTER 6 DEVELOPING PLANS AND POLICIES: LANDSCAPE-BASED LAND USE PLANNING**

<b>6.1 INTRODUCTION .....</b>	<b>6-1</b>
<b>6.2 OVERVIEW OF PLANNING AND THE GMA.....</b>	<b>6-2</b>
<b>6.3 THE IMPORTANCE OF INCORPORATING A LANDSCAPE PERSPECTIVE IN PLANNING.....</b>	<b>6-2</b>
<b>6.4 SMART GROWTH.....</b>	<b>6-4</b>
<b>    6.4.1 Green Infrastructure Planning .....</b>	<b>6-6</b>
6.4.1.1 The Greenprint Approach.....	6-7
6.4.1.2 Typical Steps in Developing and Implementing a GRIST Plan .....	6-8
Develop the Overall GRIST Approach and Define Its Geographic Scope .....	6-9
Inventory Resources .....	6-9
Envision the Future.....	6-10
Finding the Hubs and Links.....	6-10
Creating the GRIST Plan .....	6-12
Implementing the GRIST Plan .....	6-13
<b>    6.4.2 Alternative Futures.....</b>	<b>6-13</b>
A Local Example of Alternative Futures Planning .....	6-13
<b>    6.4.3 Combining Complementary Approaches .....</b>	<b>6-14</b>
<b>6.5 FISCAL SAVINGS AND OTHER BENEFITS .....</b>	<b>6-16</b>
Use of Green Infrastructure Instead of Building Infrastructure .....	6-17
Increase in Local Tax Base.....	6-17
Costs of Building in the “Wrong Place” .....	6-18
Costs of Providing Services.....	6-18

**CHAPTER 7 DEVELOPING PLANS AND POLICIES: COMPREHENSIVE PLANNING**

7.1	INTRODUCTION .....	7-1
7.2	AN OVERVIEW OF COMPREHENSIVE PLANNING.....	7-2
7.2.1	<i>County-Wide Plans and Policies .....</i>	7-5
7.2.2	<i>Tools for Implementing Comprehensive Plans.....</i>	7-5
7.3	MANDATORY ELEMENTS OF COMPREHENSIVE PLANS .....	7-6
7.3.1	<i>Land Use Element.....</i>	7-6
7.3.1.1	Incorporating Landscape Analysis into the Land Use Element .....	7-7
7.3.1.2	Using Landscape Analysis in Different Sections of the Land Use Element.....	7-8
7.3.1.3	Landscape Analysis in Policy Language of the Land Use Element .....	7-11
General Land Use .....	7-12	
Residential Open Space .....	7-13	
Environment .....	7-14	
Fish and Wildlife Policies and Aquatic Resources .....	7-15	
Frequently Flooded Areas and Geologically Hazardous Areas .....	7-16	
Natural Resource Lands.....	7-16	
7.3.2	<i>Capital Facilities Plan Element.....</i>	7-17
7.3.3	<i>Rural Lands Element .....</i>	7-18
7.3.4	<i>Transportation Element.....</i>	7-19
7.3.5	<i>Parks and Recreation Element .....</i>	7-20
7.3.6	<i>Economic Development Element .....</i>	7-20
7.4	OPTIONAL ELEMENTS OF COMPREHENSIVE PLANS: CONSERVATION ELEMENT.....	7-20
	Natural Setting Element Used in Yakima County .....	7-21
7.5	SUBAREA PLANS.....	7-22
7.6	SHORELINE PLANNING.....	7-22

**CHAPTER 8 DEVELOPING REGULATORY TOOLS**

8.1	INTRODUCTION .....	8-1
8.2	ESTABLISHING THE GOALS OF REGULATIONS .....	8-3
8.2.1	<i>Balancing Predictability with Flexibility.....</i>	8-4
8.2.2	<i>Staff Expertise and the Role of Third-Party Review .....</i>	8-4
8.2.3	<i>Risk Management for Wetland Resources .....</i>	8-5
8.2.4	<i>Types of Regulations Used to Manage Wetlands.....</i>	8-5
8.3	IMPORTANT ELEMENTS OF A REGULATORY PROGRAM .....	8-5
8.3.1	<i>Designating, Identifying, and Mapping Wetlands .....</i>	8-6
8.3.2	<i>Applicability of Regulations .....</i>	8-7
8.3.3	<i>Excepted Activities, Allowed Activities, and Exemptions .....</i>	8-10
8.3.3.1	Wetland Size Exemptions .....	8-12
8.3.3.2	Size of Minimum Wetland Impact .....	8-12
8.3.3.3	Isolated Wetlands .....	8-13
8.3.3.4	Prior Converted Wetlands .....	8-13
8.3.3.5	Irrigation-Induced Wetlands .....	8-14
8.3.3.6	Clearing, Grading, and Placement of Fill.....	8-16
8.3.3.7	Ongoing Agriculture .....	8-17
8.3.3.8	Conversion of Wetlands to New Agriculture .....	8-18
8.3.3.9	Conversion of Agricultural Lands to Other Uses .....	8-18
8.3.3.10	Noxious Weed Removal .....	8-19
8.3.3.11	Forest Practices and Conversions.....	8-19
8.3.3.12	Hazard Tree Removal .....	8-19
8.3.3.13	Non-Compensatory Restoration and Enhancement.....	8-20
8.3.3.14	Stormwater Management .....	8-21
8.3.4	<i>Wetland Rating .....</i>	8-22
8.3.5	<i>Requirements for Wetland Reports .....</i>	8-23
8.3.6	<i>Sequencing.....</i>	8-23
8.3.7	<i>Compensatory Mitigation Requirements .....</i>	8-24

8.3.7.1	Compensatory Mitigation Standards .....	8-25
8.3.7.2	Special Types of Compensatory Mitigation .....	8-28
8.3.8	<i>Buffers</i> .....	8-32
8.3.8.1	Components of Wetland Buffer Regulations.....	8-33
8.3.8.2	Reasonable Use Criteria.....	8-36
8.3.8.3	Buffer Averaging .....	8-36
8.3.8.4	Uses within Buffers.....	8-36
8.3.8.5	Enhancement and Restoration of Buffer Areas .....	8-37
8.3.8.6	Best Management Practices to Enhance or Ensure Effective Buffer Function.....	8-38
8.3.8.7	Issues in Managing Buffers.....	8-39
8.3.8.8	Buffers in Urban Areas .....	8-41
8.3.8.9	Buffers around Small Wetlands .....	8-42
8.4	MONITORING THE EFFECTIVENESS OF REGULATORY PROGRAMS .....	8-43

## **CHAPTER 9 DEVELOPING NON-REGULATORY TOOLS**

9.1	INTRODUCTION .....	9-1
9.2	ESTABLISHING THE GOALS FOR NON-REGULATORY PROGRAMS .....	9-3
	Preservation .....	9-3
	Conservation.....	9-4
	Restoration.....	9-4
9.3	COST SAVINGS.....	9-5
9.4	IMPORTANT PARTS OF A NON-REGULATORY PROGRAM .....	9-6
9.4.1	<i>Funding Mechanisms</i> .....	9-6
9.4.1.1	Conservation Futures Levy .....	9-8
9.4.1.2	Land Banking.....	9-9
9.4.2	<i>Landowner Incentives</i> .....	9-9
9.4.2.1	Open Space Current Use Taxation .....	9-9
9.4.2.2	Other Incentive-Based Conservation Approaches.....	9-10
9.4.3	<i>Incentive Zoning Options</i> .....	9-11

## **CHAPTER 10 CHARACTERIZING THE RISKS FROM PROPOSED SOLUTIONS TO PROTECT AND MANAGE WETLANDS**

10.1	INTRODUCTION .....	10-1
10.2	A PROCESS FOR CHARACTERIZING RISK.....	10-2
10.2.1	<i>Identifying the Environmental Disturbances Caused by Proposed Solutions</i> .....	10-3
10.2.2	<i>Identifying the Risk of Disturbances to the Functions and Values of Wetlands</i> .....	10-4
10.2.3	<i>Proposing Measures to Minimize the Risk or Replace the Resource at Risk</i> .....	10-5

## **CHAPTER 11 IMPLEMENTING REGULATORY AND NON-REGULATORY PROGRAMS**

11.1	INTRODUCTION .....	11-1
11.2	IMPLEMENTING A REGULATORY PROGRAM .....	11-1
11.2.1	<i>Adequately Trained Staff</i> .....	11-1
11.2.2	<i>Educational Materials</i> .....	11-2
11.3	IMPLEMENTING A NON-REGULATORY PROGRAM .....	11-3
11.3.1	<i>Staffing a Non-Regulatory Program</i> .....	11-3
11.3.2	<i>Mapping and Prioritizing Sites</i> .....	11-4
11.3.3	<i>Establishing Funding Mechanisms and Landowner Incentive Tools</i> .....	11-5
11.3.4	<i>Educating the Public</i> .....	11-5
11.3.5	<i>Creating Partnerships for Locally Sponsored Projects</i> .....	11-6
11.3.6	<i>Monitoring</i> .....	11-6

## **CHAPTER 12 MONITORING AND ADAPTIVE MANAGEMENT**

12.1	INTRODUCTION .....	12-1
12.2	WHAT SHOULD BE MONITORED? .....	12-2
12.2.1	<i>Monitoring Trends in the Resource</i> .....	12-3
12.2.2	<i>Monitoring Implementation</i> .....	12-4
12.2.2.1	Monitoring Implementation at the Contributing Landscape Scale .....	12-4
12.2.2.2	Monitoring Implementation at the Management Area Scale .....	12-5
12.2.2.3	Monitoring Implementation at the Site Scale .....	12-6
12.3	WHAT IS ADAPTIVE MANAGEMENT? .....	12-6

# List of Tables

Table 1-1. Ecological principles and their implications in making decisions about land use.....	1-5
Table 3-1. Subclasses and “families” of wetlands in different regions of Washington State.....	3-3
Table 3-2. Summary of types of environmental disturbances created by some types of land use. ....	3-6
Table 3-3. Synthesis of the information reported in the literature on the impact of different human disturbances on wetland functions.....	3-8
Table 3-4. Synthesis of the impacts of some land uses on wetland functions.....	3-9
Table 9-1. Common conservation financing sources. ....	9-7
Table 10-1. An example of a table summarizing risks associated with common land use actions. ....	10-4
Table 10-2. An example of a table summarizing the risks of land use actions and measures to minimize the risks. ....	10-6
Table 12-1. Monitoring common planning, regulatory, and non-regulatory solutions to protecting and managing wetlands. ....	12-6

# List of Figures

Figure 4-1. A suggested framework for local governments to use in protecting and managing wetlands. These four steps serve as the framework for discussions in this volume.....	4-3
Figure 4-2. An example of contributing landscape, management area, and site scales.....	4-5
Figure 4-3. Four-step framework incorporating the three geographic scales.....	4-6
Figure 5-1. Step 1 in the process of protecting and managing wetlands is to analyze wetland resources.....	5-1
Figure 5-2. Wetlands and their functions are an expression of landscape processes. Wetland functions can in turn modify the landscape processes.....	5-4
Figure 6-1. Developing plans and policies fits into Step 2 within the four-step framework recommended for protecting and managing wetlands.....	6-1
Figure 6-2. Conceptual representation of a landscape that has been inventoried as part of creating a GRIST plan.....	6-10
Figure 6-3. Conceptual representation of how hubs and links are identified as part of creating a GRIST plan.....	6-11
Figure 6-4. Conceptual representation of a completed GRIST plan .....	6-12
Figure 7-1. Comprehensive planning is part of Step 2 in the four-step framework recommended for protecting and managing wetlands. ....	7-2
Figure 8-1. Developing regulations is part of Step 2 in the four-step framework discussed in this volume.....	8-2
Figure 9-1. Developing non-regulatory tools is part of Step 2 in the four-part framework for protecting and managing wetlands. ....	9-2
Figure 11-1. Implementing regulatory and non-regulatory approaches is Step 3 in the four-step framework presented in this volume. ....	11-1
Figure 12-1. Step 4 in the process of protecting and managing wetlands is monitoring. Adaptive management is a systematic process for continually improving management policies and practices by learning from the outcomes of previous policies and practices.....	12-1
Figure 12-2. Conceptual representation of how wetlands can be protected and managed using adaptive management. ....	12-2

**DRAFT**

## Acknowledgements

Several members of the Core Team and authors worked very hard reviewing and writing this draft of Volume 2, some working after hours and on weekends. However, a special acknowledgement goes to Sara Noland of 2N Publications and Dyanne Sheldon of Sheldon and Associates both of whom went beyond the "call of duty" writing, reviewing and editing text while attending to their other demanding responsibilities. Sara had the patience of a saint as she edited text from 7 different authors and incorporated Core Team comments throughout the process.

Special kudos to Teri Granger for again managing an overwhelming project with aplomb. Working with an advisory team and with multiple authors to develop a coherent guidance document is akin to herding cats; tasks Teri does with patience, skill and tact.

Tom Noland of 2N Publications is also acknowledged for his creative technical support and Dana Mock of the Department of Ecology for pitching in at the end to help coordinate outreach to the public and assist with the final production and distribution of the document.

## Funding

Funding for this project was partially provided through a grant from the U.S. Environmental Protection Agency. The Washington Departments of Ecology also contributed to the funding for this project.

**DRAFT**
